➤ Tips for Case Searches

Search by Participant Name*

Searching by the name of a person participating on a court case is recommended, particularly if you don't know the docket number for the case.

**A Docket Number search is recommended for all Appellate Court cases.*

Less is More

Use the minimum search criteria. For example, with a participant name search, enter a first name, last name, and county* only.

**Select the Pennsylvania county where the case is filed. If unknown, this information is typically specified on documents sent by the court.*
